

## We Treat the Source of Pain

Now, with modern technology and techniques, we can diagnose and treat pain symptoms caused by the complex forces that operate and control your head, mouth, jaw and teeth.

TruDenta utilizes systems and methods perfected in sports medicine and advanced dental technologies.

The treatments are painless, pleasant and require no drugs or needles.

With TruDenta, we are able to provide lasting relief from issues that you may have suffered with for many years.

We also help reverse the unbalanced bite that leads to painful dysfunctions of the TMJ and dental foundation.

## Patient Testimonials

*"After 40 years of headaches, I have not had another one in the 15 months since completing treatment."*

*"Surprising how quick the results are after treatment."*

*"I had headaches all day, every day. I was taking probably 24 Ibuprofen every day. [Since the treatment] I haven't taken Ibuprofen for headaches for four weeks!"*

## Have you tried everything but found little or no relief from:

- Headache or Migraine
- Head, Neck, Face or Jaw Pain
- TMJ/TMD
- Tinnitus
- Vertigo

Your TruDenta dentist can now treat the underlying cause of the problem with state-of-the-art technologies.

- No Drugs
- No Needles

## Imbalanced Dental Forces

The head and mouth are home to a myriad of nerves, muscles, tendons, ligaments, joints and bones, which affect not only your teeth, but your overall health and well-being.

The forces created by these elements, when not properly balanced, can result in serious and often painful conditions including:

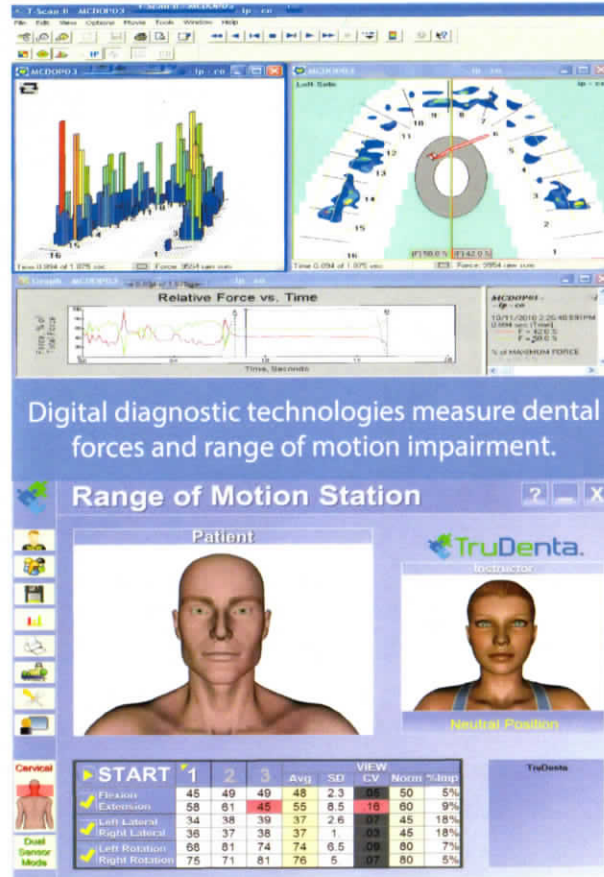

- Chronic Headaches & Migraines
  - Face, Neck & Jaw Pain
- Temporomandibular Joint (TMJ) Pain
  - Tinnitus (Ringing in the Ears)
  - Vertigo

TruDenta's proven methods identify issues which can lead to painful symptoms.

If you are plagued by any of these issues, call us today to receive your screening, and find out if TruDenta is right for you.

Amazing pain relief could start with the very **first** treatment!

## State-of-the-Art Technology

## Life Changing Dentistry

TruDenta dentists are trained and equipped with patented examination, diagnostic and treatment technologies.

You will see a real time movie of your bite, and the distribution of the forces within your mouth, on a tooth-by-tooth basis.

We also examine your cervical range of motion (the ability to tilt, turn and tip your head) which is also a sign that your symptoms could be dental force related.

Once your symptoms have been diagnosed, your specific treatment can begin immediately.

Therapy sessions last about one hour and include the use of several FDA-cleared, painless technologies, including ultrasound, low-level cold laser, microcurrent, trigger point manipulation.

Patients require from one to twelve treatments, completed weekly. Many patients are amazed at the relief they feel after their very first appointment!

*Over 95% Success*  
Reported by Over 400 TruDenta Doctors!

*Get your life back!*
